

Traffic Control and Parking

A security guard may be called upon to control traffic on private property at gated entrances to buildings or in parking lots, to ensure traffic safety and to assist in the movement of vehicles. It is important for the guard to use conventional signals and movements in order to be understood and seen by the drivers.

Guards should be dressed comfortably according to weather conditions. Proper reflective vests or cuffs must be worn to ensure visibility. This control should be done in a courteous and persuasive manner, trying to make people understand the reasons for the control.
