

Section 8: Legal Jurisdictions

The instructor places emphasis on the comprehensive legal framework surrounding private security, aiming to guide the student in understanding the boundaries and privileges inherent in their role as security guards. The trainer will also elaborate on the sources from which security guards draw their authority to fulfill their job responsibilities. This section encompasses four key elements: Navigating information and the Personal Information Protection and Electronic Documents Act (PIPEDA), Supplementary legislations, The Criminal Code, and Tort law. It is crucial for security guards to be well-versed in this legislation only within the context of its relevance to their specific roles.
